PROCESS STAGE 1 OF 6 · CUT

Rubber Bale Cutter

VI-CUT-01-02 · 10–15 t

The Rubber Bale Cutter cuts large rubber bales into manageable pieces for further processing. A powerful hydraulic blade slices through tough rubber, the robust frame holds up in demanding plants, and simple operation with safety features reduces labour and waste at the very first stage of the process.

Heavy-duty blade
Slices through tough natural and synthetic rubber bales.

Safety lock mechanism
Guards the operator during every cutting stroke.

Adjustable cutting height
Set the piece size your mixing stage needs.

Hydraulic operation
Smooth, powerful strokes from a compact power pack.

Rubber bale cutter models

Model	Roller bed size (in)	Blade size (in)	Cutting stroke (in)	Capacity (t)	Power pack (HP)
VI-CUT-01	18 × 24	18	12	10	3
VI-CUT-02	24 × 36	24	24	15	5

Specifications are a starting point. Every machine is configured to your compound, product and line layout. Send us your requirement for a configured specification and written quote.
