PROCESS STAGE 6 OF 6 · MOULD

Rubber Moulding Hydraulic Press

VHY-01-10 · 35-600 t

The Rubber Moulding Hydraulic Press is built for precise, efficient compression moulding. The vacuum type gives bubble-free mouldings, automatic and semi-automatic types raise output and consistency, and the manual type is a cost-effective choice for small batches and custom work.

High tonnage capacity
From 35 to 600 tonnes across ten frame sizes.

Automatic pressure
Holds set pressure through the cure cycle.

Robust frame design
Rigid platens for even pressure across the mould.

User-friendly interface
Clear controls your operators learn quickly.

Rubber moulding hydraulic press models

Model	Platen size (mm)	Capacity (t)	Ram dia (mm)
VHY-01	300 × 300	35	150
VHY-02	400 × 400	65	200
VHY-03	500 × 500	100	250
VHY-04	600 × 600	150	300
VHY-05	700 × 700	200	350
VHY-06	800 × 800	260	400
VHY-07	900 × 900	330	450
VHY-08	1000 × 1000	410	500
VHY-09	1200 × 1200	600	600
VHY-10	1250 × 1250	600	600

Approximate working pressure 210 kg/cm².

Specifications are a starting point. Every machine is configured to your compound, product and line layout. Send us your requirement for a configured specification and written quote.
